EXPERIENCE

Paytm (*India's PayPal & largest Fintech*)

Sr. Product Manager (Apr 2025–Dec 2025)

Noida, India

- **Leadership:** Managed 2 PMs & 1 Data Analyst; led requirement gathering, sprint planning, OKRs & stakeholder alignment
- **Monetization:** Owned Pricing engine for **30M** Payment gateway merchants (**10B transactions & \$440M ann. revenue**), discovered & built charging solutions for BNPL & Super-premium cards resulting in **\$0.5M additional annualized PAT**
- **Growth Strategy:** Launched RuPay card (like Visa) journeys on web & merchant apps, enabling **0.3M monthly activations**

Paytm

Product Manager (Apr 2022 -Mar 2025)

Noida, India

- **Customer Retention:** Architected dynamic rental charging system to automate offer-based deductions for 9M+ mPOS devices & reduced annual churn by 120k units
- **Digital Transformation:** Led legacy system migration from Salesforce to custom onboarding engine & acquired **~2.5M merchants annually**, eliminating **\$540K** in licensing costs & 60% reduced frauds
- **Operational Efficiency:** Built Interchange cost reconciliation solution (processing **\$320M**) by building rule engine, preventing **\$400K** in fund losses & resolving org's 2nd biggest cost-driver
- **UX:** Owned merchant facing **Payment acceptance front-end (400k DAU)**, built DIY activation journeys & funnels to up-sell QR merchants' BNPL products
- **Process Automation:** Led invoice automation for **30M merchants** & revamped MIS & Data warehouse to ensure 10M automated invoices & 4% decreased contact center volume
- **Compliance:** Performed data analysis using SQL on 30M user-base to correct **35k** profile issues & built AML / KYB APIs
- **GTM:** Conducted Voice of Customer & POC studies to launch subscription payments resulting in **\$2M** additional revenue

Infosys

Sr. Software Engineer - Specialist Programmer (Aug 2019-Aug 2020)

Hyderabad, India

- **Product Optimization:** Managed SDLC & architected HLDs to serve 25x service agents & improved CSAT by **50%**
- **Engineering:** Built end to end e-commerce Progressive web app using full-stack (MongoDB, Express, React, Node), & automation testing to ship in **6 sprints**
